

route purple

2012

There are many routes to the final point but at **route purple** we choose to follow the mind's eye.

route purple follows a non-aggressive, nature friendly ideology where trekking is a pleasurable interaction with nature and NOT a needless exercise in endurance or a display of one's physical strengths.

We believe that nature is to be revered, respected and appreciated. **route purple** therefore runs alongside nature, rather than against it. If you too wish to whisper with nature... try the **route purple**
